15+
Therapeutic Areas

500+
Employees

When you need direct access to patients, physicians,
and research-enabling technology, there's Only Elligo.

HOW CAN ELLIGO ACCELERATE YOUR RESEARCH?

With two comprehensive service models and supporting technology, Elligo is your complete solution for research and commercialization success.

PatientSelect

Focusing on the patient journey, PatientSelect optimizes the intersection of healthcare and research and accelerates clinical trials by offering:

- Direct access to more than 150 million known patients through HIPAA-compliant identified healthcare data
- Tailored services that allow researchers to join trials with minimal infrastructure

SiteSelect

Improving research site performance for your customized and conventional trials, SiteSelect optimizes site selection through:

- Our network of fully powered healthcare-first sites
- Elligo-supported conventional sites
- Study-specific site services

STATE-OF-THE-ART TECHNOLOGY PORTFOLIO

Powers data management, patient identification and interaction, study workflow, eSource solutions, and more.

A reusable, end-to-end platform to source, process, analyze, and distribute patient medical record data at scale.

Real-world healthcare platform for study conduct and eSource.

AI-powered pre-screening and patient concierge tool

**OPTIMIZE THE INTERSECTION OF HEALTHCARE AND RESEARCH.
ACCELERATE YOUR CLINICAL TRIAL.**

About Elligo Health Research®

Elligo Health Research accelerates clinical trials through healthcare with access to over 150 million known patients and their HIPAA-compliant healthcare data, our IntelliGO® Research Stack technology, and our PatientSelect identification and engagement model. Coupled with the largest Known Patient Access Network, Elligo's Site Solutions enable healthcare practices and research sites to participate in clinical trials. By adaptive engagement of known patients and physicians, we accelerate the development of new pharmaceutical, biotechnology, and medical device and diagnostic products.
